Methodology

THE WEEK-Hansa Research Best Colleges Survey 2015 covered 11 disciplines: arts, commerce, science, engineering, medicine, law, hotel management, social work, fashion technology, mass communication and dentistry. The survey was conducted across Ahmedabad, Bengaluru, Bhopal, Bhubaneswar, Chandigarh, Chennai, Coimbatore, Dehradun, Delhi, Ghaziabad, Gurgaon, Noida, Gandhinagar, Guwahati, Hyderabad, Indore, Jaipur, Kochi, Kolkata, Lucknow, Mumbai, Patna, Pune, Thiruvananthapuram and Vadodara.

Perceptual data collection

A primary survey was conducted among 741 academic experts, 2,240 students, 250 aspirants and 20 recruiters spread across cities and disciplines. Recruiters were consulted for rating only engineering colleges, and aspiring students were interviewed for rating only engineering and medical colleges. A closed-ended questionnaire was given and stakeholders were asked to nominate and rank top 25 colleges in India and the top colleges in their respective cities.

Factual information collection

Factual data was collected from March to April. A dedicated website was created and the link was sent to more than 2,000 colleges. As many as 200 col-

leges responded to phone calls, emails, personal visits and advertisements published in THE WEEK inviting them to participate in the survey.

Ranking methodology

Rankings of colleges for arts, commerce, science, medicine, law, engineering and hotel management were based on a composite score derived by combining perceptual and factual scores. For colleges that could not respond within the stipulated time, composite scores were derived by combining perceptual score with an interpolated factual score based on their position on the list. Rankings for colleges for dentistry, fashion technology, mass communication and social work were based only on perceptual data.
